WeCare Compost® for Topdressing Athletic Fields

SIMPLE TOPDRESSING PROGRAM:

1. Core aerate the entire field
2. Apply ¼" of WeCare Topdressing Mix
3. Use a rake or drag mix compost into open aeration holes
4. Overseed the thin areas to help fill in
5. Re-drag to achieve good soil/seed contact

Let us help you grow, season after season!

BENEFITS

- INCREASED WATER HOLDING CAPACITY
- INCREASED DRAINAGE
- REDUCED COMPACTION
- INCREASED SOIL MICROFLORA
- INCREASED NUTRIENT HOLDING CAPACITY
- REDUCED DISEASE

Each ¼" application delivers approximately 2-3 LB of available N per 1,000 square feet which means you can replace 1-2 fertilizer applications!

From 50 cubic yards to 50,000 cubic yards, WeCare Compost® products will help you grow.

Uses for WeCare® Topdressing Mix for Golf Courses

FLOWER BEDS

Add WeCare Compost to a 5-6” depth and increase bed depth of rooting, water holding capacity, reduce disease, increase drainage, porosity, and feed plants all year.

NEW CONSTRUCTION

Add WeCare Compost at a rate of 20-30% by volume of soil mixes for new tees, fairways, or approaches to accomplish an excellent soil blend for fast germination and turf establishment.

TOPDRESSING OF ROUGH APPROACHES

Topdress approaches or rough areas with ¼” of WeCare Compost to help reduce compaction, increase drainage and nutrient holding capacity, and reduce diseases.
